How much would it cost you to start a Layers poultry farm of 1000 birds? In this video I share this. To Purchase HIGH QUALITY FERTILISED Layer Chicken Eggs: farmuppoultry@gmail.com. We ship worldwide.

Where your farm is located affects the cost, the land size is also a factor.

The chicken pen size, design and struct

Bedding like wood shavings for the chicken house floor

Brooder paper (cardboards or newspaper) is also needed to place on the wood shavings.

Plywood is also needed to make the brooder pods when the chicks are growing up. You can also use cardboard

Charcoal - USD \$110

You need to pay for heating the birds while brooding, you can use electricity, gas, charcoal etc. to supply the heat. You will need about 10 bulbs for 250Watts if electricity. With charcoal and buying the sacks instead at \$11/bag.

Pots/Stoves - USD \$21

You also need pots to put and burn the charcoal inside.

Chick drinkers - USD \$29

This is a chick drinker

Adult drinkers - USD \$183

You can also make your own drinkers from jerry cans.

Chick feeders - USD \$4.3

You also need chick feeders

Adult feeders - USD \$216

Chicks mash - USD \$1100

Growers mash - USD \$1430

Layers mash - USD \$1500

The feed includes chicks mash (0-8 weeks), growers mash (9-18 weeks) and layers mash (19-24 weeks before laying starts).

Vaccination, deworming, vitamins - USD \$340

Miscellaneous - USD \$300

Other costs include things like laying nets, patches, gumboots, detergents for cleaning things, disinfectants, etc.

Labour

Labor include getting people to do the work on the farm the cost depends on the location.

Total - USD \$6583

To start a Layers poultry farm for 1000 birds from day 0 to about 24 weeks, the point where you start getting and selling eggs.

We have not included water cost, the roof traps the water into a water tank in my case here.
