Re: Quality Poultry layer Cage by survivalagro: 1:52pm On Mar 23, 2019

Poultry farming is the process of raising domesticated birds such as chickens, ducks, turkeys and geese for the purpose of farming meat or eggs for food. Poultry - mostly chickens - are farmed in great numbers. Farmers raise more than 50 billion chickens annually as a source of food, both for their meat and for their eggs. Chickens raised for eggs are usually called layers while chickens raised for meat are often called broiler.

Re: Quality Poultry layer Cage by interceptor84(m): 3:34pm On Mar 31, 2019

This broiler cages, do you have anyone with less capacity than 120 birds? I am looking for one that can do 50 to 70 bird for a trial. We use deep litter system but I want to try out the cage system and see if it works.
